

Scope of Work Document

Scope of Work (SOW) -

Build an application or add a unique twist on a common application. The application can be a game, a business support program, or robot to give a few examples. Projects should focus on creating C++ or Swift applications that utilize long-term data storage.

Please submit your Scope of Work Document detailing the application you plan to complete. Your last assignment will implement your plan

Student Project – Scope of Work (SOW)

Project Title: _____ The Lost Relics: A Text-Adventure RPG _____

Student Name: _____

Date: _____

1. Project Overview

(Write 2–3 sentences about what your project will do.)

This RPG consists of a player-controlled game within a fictional universe where the characters fight against their enemies and take care of various resources. In this application, the backbone consists of a saving mechanism that saves the data of the character into a file on the local computer to retain its stats and location in a persistent manner.

2. Features

- Example: Ability to add new users
- Creating a customized character with an initial class selection.
- Turn-based battle system with random enemy encounters.
- Inventory system for gathering, dropping, and using items.
- Saving/Loading game using C++ file input/output that allows saving of the game progress in a text or CSV file.

::: Scope of Work Document

- Navigation menu system for navigating through various locations on the game
-
